Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/531,743	Applicant(s) CARRIERE ET AL.	
	Examiner Mussa A. Shaawat	Art Unit 3627	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 June 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-32 is/are pending in the application.
- 4a) Of the above claim(s) 1-27, 31 and 32 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 28-30 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Response to Amendment

1. This action is in response to amendment filed on June 08, 2007. Claim 28 has been amended. Claims 1-27 and 31-32 have been previously withdrawn. Claims 28-30 are pending examination.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 28-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 28 have been amended to recite "conducting an Internet search of non-voice sources in any conventional web page format", it is unclear and indefinite to the examiner as to what the phrase "*conventional web page format*" implies too, what might be conventional to me might not be conventional to others. Appropriate correction by applicant is required.

Claims 29-30 are rejected based on dependency from independent claim 28.

4. Claims 28-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has amended claim 28 to include "in any conventional web page format" in page 12 of the remarks applicant mentions that

support for the amended feature in claim 28 is relied upon Page 9, line 23 to page 11, line 24 in the specifications, examiner have reviewed the specification and found no support for the amended feature "in any conventional web page format".

Claims 29-30 are rejected based on dependency from independent claim 28. Appropriate correction by the applicant is required.

Claim Rejections – 35 U.S.C. 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that
3. are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or unobviousness.

4. Claims 28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krane et al. US Pat. No. (5,799,063) in view of Uppaluru et al., US Pat. No. (6,400,806) as discussed in the previous office action. Further:

Krane teaches a method of operating an interactive user operated Internet voice portal 7 having established multiple predetermined vertical domains of interest (i.e., talk web menu and book-marks describing a collection of web sites; See Col. 5, lines 39-

Art Unit: 3627

65); the domains having attributes within (i.e., the actual collection of web sites associated with each domain); responsive to a user placing a telephone call to the voice portal, identifying the user (See for example Col. 3, lines 42-57) and obtaining user selection of a vertical domain of interest (Col. 5, line 39); performing funneling operations (See for example Col. 3, lines 42-57, and Col. 6, lines 40-44) by applying speech recognition to user chosen attribute values (i.e., the selected web site of interest) where recognized answers are limited to contents of a vocabulary set (inherent with speech recognition); the user repeatedly choosing an attribute until a bottom level attribute is chosen (i.e., the desired web site is found; Col. 6, lines 40-44); conducting an internet search for prescribed types of information (i.e., search for a desired item in a store catalogue as is well known in Internet surfing; Col. 6, lines 40-44); audibly providing resultant information via the telephone call.

Krane lacks the specific teaching of building a vocabulary set containing top-level attribute values appropriate to the selected vertical domain of interest; repeatedly building an updated vocabulary set appropriate to the latest chosen attribute value.

Uppaluru teaches building vocabulary sets appropriate to a selected domain (See for example Col. 13, lines 24-30) and repeatedly updating the vocabulary set appropriate for a chosen attribute or service (See for example Col. 13, lines 9-23).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Krane to include the specific teaching of building a vocabulary set containing top-level attribute values appropriate to the selected vertical domain of interest, and repeatedly building an updated vocabulary set appropriate to the latest

chosen attribute value, in view of Uppaluru, in order to provide words in the speech recognition system that are "specifically tailored to the words more commonly associated with the corresponding service" (See Uppaluru, Col. 13, lines 24-26).

In addition, Krane et al., fail to disclose, conducting an Internet search of non-voice sources (i.e. text) in any conventional web page format and audibly providing resultant information to the user via the telephone call (i.e. voice or speech).

However, Uppaluru teaches conducting an Internet search of non-voice sources (i.e. text) in any conventional web page format and audibly providing resultant information to the user via the telephone call (i.e. voice or speech), see (at least col.7 lines 10-65 col.8 lines 21-35 and col.12 lines 3-5). It would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the teachings of Uppaluru into the disclosure of Krane in order to provide the user with the flexibility of searching the Internet and viewing the information via any conventional web page format for example HTML and in order to provide universal access to voice and speech files in order to allow widespread use of such files for performing speaker dependent speech recognition, (see col.2 lines 21-25).

Re claim 29: Krane anticipates the limitation of the funneling being performed if the voice portal has not previously stored any attribute value preferences of the user for a selected vertical domain of interest (i.e., the funneling occurs in Krane whether or not there are bookmarks stored on the system). The funneling operation is additionally performed if the voice portal has previously stored any attribute value preferences of the user for a selected vertical domain of interest, but the user has opted to override the

Art Unit: 3627

stored attribute value preference (i.e., the funneling occurs in Krane if there are stored bookmarks, but the user chooses to choose another/different attribute in from the Talk Web menu).

Re claim 30: Regarding the limitation of the funneling operation being only performed if the voice portal has not previously stored any attribute value preferences of the user for the selected vertical domain of interest: it would have been obvious to one of ordinary skill in the art to modify Krane to include this limitation, in order to be able to find desired sites when the "Talk Web Menu" contains no listing of sites.

Further regarding claim 30, specifically the limitation of: "the operations further comprise, if the voice portal has previously stored any attribute value preferences of the user for the selected vertical domain of interest, instead of the funneling operation, performing an operation of conducting an Internet search for prescribed types of information pertaining to the stored attribute value preferences", the limitation is anticipated by Krane in that the bookmarks provide the attribute value preferences and the site associated with a selected bookmark anticipates the limitation of conducting an Internet search (i.e., the retrieving of the site) for information (i.e., the information on the site) pertaining to the stored attribute value preference (i.e., the selected bookmark).

Response to Arguments

5. Applicant's arguments have been fully considered but they are not persuasive. In particular Applicant argues, A) there is no teaching or suggestion to combine the subject matter of Uppaluru into the disclosure of Krane.

8/14/07
P. 2.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). ~~In this case,~~ In this case, it would have been extremely advantageous to include the teachings of Uppaluru into the disclosure of Krane for the purpose stated in the previous action dated 3/9/2007, which is to provide a universal access to voice and speech files to allow widespread use of such files for performing speaker dependent speech recognition (see col.2 lines 21-25). Therefore in view of the above evidence, Krane in view of Uppaluru still meets the scope of the limitation as currently claimed.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mussa A. Shaawat whose telephone number is 571-272-2945. The examiner can normally be reached on Mon-Fri (8am-5:30pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Florian Zeender can be reached on 571-272-6790. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 3627

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
